Projects

E-Commerce Site

<https://ziyak-clothing.herokuapp.com/>

- › Uses technologies like react, nodejs, firebase and stripeAPI.
- › Items can be dynamically added and removed via an admin panel which is only available to authorized users .
- › Items purchased can be added to a cart. Once done adding items to a cart you can go to checkout where you can remove items you don't want and pay for the other items.

Single Page App

<https://snowbrightimports.com/>

- › Simple SPA that is made using technologies like HTML, CSS and Bootstrap.
- › Hosted online using netlify by connecting domain given by the client to netlify.
- › Responsive website(mobile friendly) and SEO optimized.

N-Model Form

<https://ziyak-form.herokuapp.com/>

- › Made using technologies like react, nodejs, express and MongoDB.
- › This form has multiple steps. The number of steps are chosen by the user.
- › The user can add multiple machine learning models for each step.
- › All models inside a model table are available to the user such that he can dynamically select from the list of models available.
- › The user can also choose the parameters of each selected model dynamically.
- › Appropriate validation is done to make sure the user enters parameters and also models based on the the number of steps the user chooses.

My Personal Site

<http://ziyakjehangir.com/>

- › Uses technologies like react and CSS modules (CSS in JS).
- › Uses CSS variables in order to enable a dark mode and light mode.
- › SEO optimized and mobile responsive with transition animations.

Work

Javascript Development & Teaching

Feb 2019 - present

- › Interface with clients on an as needed basis, providing technological expertise.
- › Teach HTML, CSS and Javascript to kids including how to solve algorithms.
- › Provide consultancy to teams with regards to the technical direction they should take.

Audi

Nov 2018 - Jan 2019

- › Helped with managing and maintaining the main server.
- › Made sure only authenticated users got access to their resources.
- › Found a solution to data retrieval issues after our server was hacked.
- › Proposed and implemented safety measures to prevent hacks in the future.
